-BRIEF WIRINGS-

Cleveland in Wisconsin.
Milwaukee, May 5.—The Democratic state convention is in session here. The sentiment of the meeting is overwhelmingly in favor of Cleveland.

Republican Victory.
St. Paul, May 4.—With three precincts out of the 110 reported, Rep. Allen can, has a majority of 3,200 over Smith, Democrat, for mayor, in yesterday's election.

Wheat Movement.
Duluth, Minn., May 5.—The stocks of wheat at Duluth, which a week ago were the largest ever held anywhere in the history of the American grain trade, have been reduced 2,000,000 bushels the last week. Shipments for the week to the east were 2,800,000 bushels, and receipts 800,000. It has been the largest week for grain shipments ever seen in the northwest.

Going Abroad.
New York, May 5.—Mrs. Robert McCormick, of Chicago, sailed for England yesterday. The rush to Europe has begun in earnest and the exodus this year promises to be greater than ever before. For certain sailings for the next three months practically all berths are already engaged. The long engagement of berths is especially true of the higher priced accommodations. The dock cabins and suites of rooms on the "City of New York" and the "City of Paris" are already nearly all taken for every trip they can make during the season. The return travel will be heavier as thousands of Europeans are expected to be here in October.

Didn't Pan Out.
Duluth, Minn., May 5.—A large English syndicate, which has been carrying on copper mining operations on Isle Royale, Lake Superior, for two years past, has decided to abandon the field and go out of existence. The Wendigo Copper company was organized three years ago to explore and mine for copper at sites on several parts of Isle Royale where there were remains and indications of prehistoric mining by races long anterior to the Indians. The company has spent two years sinking pits, exploring with diamond drills, and uncovering and continuing the drifts made by the Mount builders, but all to no avail.

Honors to Mr. Childs.
Chicago, May 5.—The round of festivities in honor of Mr. George W. Childs was continued today. At noon he was the guest of Victor E. Lawson, of the Daily News, at a luncheon given in the crystal banquet hall of the Richelieu. Covers were laid for thirty guests, and the proceedings were entirely informal. At the conclusion of the luncheon, the Daily News and party were driven to Jackson park, and made a tour of the World's fair buildings. This evening they will be entertained at dinner by Cyrus H. McCormick, and at 9 o'clock there will be a reception at the rooms of the Chicago Press club.

Mexico's Great Holiday.
City of Mexico, May 5.—To-day is the Mexican 4th of July. It was on this day twenty-nine years ago that the French troops of Napoleon III, who were marching to Mexico City were met at Puebla, about 200 miles from the capital, and routed. The French wanted to establish a monarchy and keep Maximilian on the throne, but through the victory the Mexicans regained their liberty. The day is being celebrated with patriotic demonstrations in every town and hamlet from the Pacific to the Gulf and the Rio Grande to Guatemala. The greatest demonstration is in this city where 20,000 troops will be reviewed by the president and his cabinet. This afternoon scores of patriotic meetings will be held, and there will be flags, fireworks, speeches and cannonading, which added to the throng of clod and mud and humanity makes the City of Mexico one of the greatest sights in the world.

"August Flower"

Mrs. Sarah M. Black of Seneca, Mo., during the past two years has been affected with Neuralgia of the Head, Stomach and Womb, and writes: "My food did not seem to strengthen me at all and my appetite was very variable. My face was yellow, my head dull, and I had such pains in my left side. In the morning when I got up I would have a flow of mucus in the mouth, and a bad, bitter taste. Sometimes my breath became short, and I had such queer, tumbling, palpitating sensations around the heart. I ached all day under the shoulder blades in the left side, and down the back of my limbs. It seemed to be worse in the wet, cold weather of Winter and Spring; and whenever the spells came on, my feet and hands would turn cold, and I could get no sleep at all. I tried everywhere, and got no relief before using August Flower. Then the change came. It has done me a wonderful deal of good during the time I have taken it and is working a complete cure."

G. G. GREEN, Sole Man'fr, Woodbury, N.J.

REPUBLICAN CONVENTIONS

Half a Dozen States To-day Naming Delegates to the Minneapolis Gathering.

Milwaukee, May 5.—The Republican state convention opened here this afternoon. Although the Democratic convention played a full state ticket in nominating yesterday, their opponents to-day will simply elect delegates to Minneapolis, and the convention for the nomination of state officers will not be held until fall. The delegates to the national convention have already been agreed upon. They are ex-Senator Spooner, that old veteran Gen. Lucius Fairchild, Senator Sawyer and Henry C. Payne. Ex-Gov. Hoard, however, would like to be one of the quartet, and the suggestion was made to-day that Payne should withdraw in his favor. This, however, he is not likely to do. Hoard will make no contest for the honor.

Pocatello, Idaho.—The Republican state convention to select delegates to Minneapolis was called to order here this afternoon by Hon. J. Binkham, of Boise City. No state has been made up for delegates at large. The Republicans of Idaho are almost unanimously in favor of the Plumed Knight if he can be induced to attend. Their second choice is President Harrison. There is considerable feeling against the president, however, on account of his appointment of Judge Beatty as U. S. district judge against the earnest protest of the Idaho delegation in congress, and the supreme bench and bar of the state.

Reno, Va.—An unimportant delegation will be sent to Minneapolis by the Republican state convention which opens here this afternoon with Gen. Malone in the chair. A resolution endorsing the administration of President Harrison will, however, be passed. Gen. Malone, John M. Livingston and Gen. Edgar Allen will be three of the delegates at large. Half a dozen politicians want the fourth place. Malone is not particularly favorable to Harrison from the fact that the latter appointed Malone's bitter enemy, Col. James B. Brady, collector of internal revenue. Brady made a strenuous effort to defeat Malone in the county conventions, but succeeded in getting only one-tenth of the delegates.

Martinsburg, W. Va.—Hon. B. F. McLean, of Mountaineer, called the Republican state convention to order to-day. Only delegates to Minneapolis will be selected as the state convention for the nomination of state officers has been fixed for Huntington on August 3. As this is the state of Secretary of War S. R. Elkins a Harrison delegation will naturally be sent to Minneapolis, although the Boise sentiment in the state is strong. However, it is claimed a strong morning are that the Republican state convention, which assembles here this afternoon, will send unimportant delegates to Minneapolis. Ex-Speaker Reel, of Maine, says it is claimed a strong morning are that the Republican state convention, which assembles here this afternoon, will send unimportant delegates to Minneapolis.

Getting Too Big.
Chicago, May 5.—The directors of the World's Columbian exposition will meet in special session this afternoon for the purpose of receiving the report of the committee recently sent to Washington to urge the necessity of financial aid from congress. The general impression prevails at World's fair headquarters that the situation is getting serious. The most conservative estimate is that at least \$8,000,000 above all present resources will have to be expended before the gates can be opened. If congress decides that no aid is necessary, or only in half or quarter the amount asked for by the directors the question where the money is to come from will assume a troublesome aspect. There are members of the board who believe that it would be possible to get \$5,000,000 in aid by going out on the streets and hustling. Conservative and experienced bankers and financiers identified with the enterprise, however, have not much to say in aid of that. They do, however, matter to how great an extent patriotism and local pride might be appealed to. It is feared, moreover, that the appeals to congress, and the fact that the enterprise actually stands in need of this additional immense amount of money will have a bad effect upon the European governments and intending exhibitors abroad.

Military Improvement.
Washington, May 5.—A delegation from St. Louis is in the city pressing the claims of Jefferson barracks for reconstruction and improvement. Bills are to be opened by the war department two weeks hence for immediate work of improvement on these barracks, and the delegation is trying to secure the immediate appropriation of \$5,000,000, of \$2,000,000, in order that the ancient post may be made the most important in the west. There had been a difference of opinion between the state authorities and the war department on the question of jurisdiction over the Jefferson barracks reservation, but this has been settled and the delegation is much encouraged by its reception at the war department.

That So-Called Short Line.
Denver, May 2.—Jeff Reynolds, of Las Vegas, who has been working up the Denver & El Paso short line, arrived in the city yesterday noon, accompanied by Chief Engineer Horace Ropes. Mr. Reynolds thinks that Gould has no unfriendly feeling toward the new company, but bought the line in New Mexico because he could get it for nothing and make good use of it. Mr. Reynolds goes east to-night in the interest of the line, and Mr. Ropes starts over the line to make an estimate of the traffic outlook. They were in consultation with Mr. Jeffrey to ascertain if the Rio Grande has a friendly feeling for the short line.

Received at Chas. Neustadt & Co., 50-000 cigars of different brands and grades, which will be sold at prices which were never before known in this country. You will not have to pay for the name of the maker, but will receive actual value for your money.

A swarm of locusts six miles wide is reported to have passed over the country near Grahamstown, Cape Colony. They have destroyed the maize crop in the Orange state.

Frank J. Victoria, correspondent of the Chicago Sunday Sun at Oshkosh, Wis., was killed and fractured his skull in an orderly manner and the police would not interfere.

Professor G. H. Palmer of the Harvard philosophical department has accepted a chair in the department of philosophy at the University of Chicago.

The pope has confirmed the decision of the propaganda favoring Archbishop Ireland's plan of allowing American Catholic schools to be taught by state teachers, and has refused to be given after regular school hours.

AN INCONSISTENT TALE.

Mexico Lead Ores and the Effects of Democrats to Injure the Mining Industry.

Washington, May 3.—Representative Whiting, of Michigan, has prepared and will submit to the house the report of the majority of the ways and means committee recommending the passage of the bill to place on the free list silver-lead ores, when the silver exceeds the lead in value.

After calling attention to the rulings of the treasury department that the metal of predominating value determined the dutiable character of ores, the report says the McKinley law changed this by imposing a duty of 1½ cents a pound on lead in silver ores which results in increased injury to American smelters.

The use of silver-lead ores for smelting the dry silver ore mined in the United States is an imperative necessity, and they are not only required as the raw material of smelters but are essential to the industry. American smelters must secure this ore, and as the domestic supply does not meet the demand, heavy importations of Mexican ores must be made.

Now, however, new conditions have arisen. The smelting interests of this country and those of the United States proposed is granted, the quick transfer across the Mexican border of a large proportion of the smelting industry to the great injury of American labor and of the smelters and other kindred industries.

The results of the McKinley act upon the industry demonstrate that it has led to direct and increasing injury of American labor, capital and market.

Without a corresponding benefit to any home industry. The sole benefits have been to foreign interests and the sole injury to our own people, and unless quickly remedied, injurious results will be past all cure.

In conclusion the report says that while the bill will not cure the evils which the present law has created if promptly adopted, it will modify its injurious effect upon our home industries.

The foreign affairs committee has suggested that this concession would probably be of mutual advantage in securing reciprocity with Mexico. The imposition of a duty upon silver-lead ores was regarded by Mexico as an unfriendly act, and the Mexican government at once retaliated by increasing her duties upon our agricultural products, for while our sister republic has really been the only one benefited by the duty, she realizes that in passing the law it was of a pure purpose to injure her, and acts accordingly.
